SKILLS

Languages:

C++ • Python • JavaScript

Web Development:

React.js • Django • Node.js • MongoDB

Familiar:

Solidity • Git Version Control • SQL

COURSEWORK

UNDERGRADUATE

Data Structures

Algorithm Design and Analysis

Object Oriented Programming

Operating Systems

Database Management System

Computer Networks

ADDITIONAL

Data Structures and Algorithms

Full Stack Web Development

Technical Content Writing

Blockchain

Artificial Intelligence

EXTRA ACHIEVEMENTS

- Won 7 National and Global level
hackathons

- Got featured in a media publication

- Received "District Topper" award in high
school

- Also founded these products:

SCREENSCULPTOR, GetIntoWeb3

EXPERIENCE

MAKEUSEOF | AUTHOR AND EDITOR (PROGRAMMING, CRYPTO, AND AI)

March 2021 – Present

- Documented **100+ project-based articles** on various topics including Python, ChatGPT, JavaScript, React.js, C++, Git, GitHub, Node.js, CSS, DSA, etc.
- Edited **300+ articles** in the Programming, Crypto, and AI domain.
- Responsible for managing a global team of 80+ technical authors.
- Responsible for keeping up the whole team with the latest and evergreen developments in Programming, Crypto, and AI domain.
- My articles have been read by **millions of readers** around the globe and had been endorsed by several top companies and industry leaders.
- **See Profile**

MUSIXVERSE | Co-FOUNDER (TECHNICAL PRODUCT MANAGER)

November 2021 – March 2023

- Lead the team from ideation to successful product launch.
- Wore multiple caps including product manager, scrum master, developer, tester, operations lead, and marketing lead as required.
- From researching users and markets to defining and developing platform features, securing grants, understanding end-user requirements, and managing the team to ensure timely task completion, I played a critical role in every aspect of the project's success.
- **See Project**

GEEKSFORGEESKS | TECHNICAL CONTENT WRITER

October 2020 – October 2021

- Documented articles on various topics like Python, GitHub, Django, etc.
- Created new coding challenges related to Data Structures and Algorithms.
- **See Profile**

MRKTDB | FULL STACK DEVELOPER

June 2020 - May 2021

- Developed an automated web scraper for extracting 13F data from SEC EDGAR that efficiently extracts millions of records of 7000+ CIKs.
- Worked with the backend team to design schema for the data received from SEC EDGAR.
- Developed the charts and dashboards for the platform by simplifying EDGAR data and integrating data received from 3rd party software.
- Tech Used: React.js, Python, Django, MongoDB, Selenium, ChartJS.
- **See Project**

PROJECTS

FAILSTODELIVER | See Project

- Developed a Python library that scrapes failstodeliver data from SEC EDGAR.
- With thousands of downloads, this library is actively used in the finance industry.
